

A Fantastic Duo: dermaividuals® and LED

As our largest organ and receptor of light, our skin has the amazing ability to absorb light and transform it into energy. The power of this incredible light can be harnessed to aid healing of the skin through LED (Light Emitting Diodes) therapy. Utilizing this therapy increases the permeability of the cell membrane allowing deeper penetration of the pure nutrients and active ingredients found in dermaividuals® skincare products.

As a professional skin care provider, focusing on the potent products in the dermaividuals® line and how they can be enhanced by LED, can only improve your clients' success stories.

Our aim as skin care clinicians should always be to maintain the skin barrier in its natural condition. This is the advantage you have with dermaividuals®. The active agents in our products are able to repair the natural barrier without impairing regeneration within. These products combined with the simple to use, non-invasive, therapeutic benefits of LED Light Therapy are a winning pair.

The use of light and color for healing and health dates back thousands of years. Ancient civilizations around the globe all respected the power and healing properties of light and color. Today, we are rediscovering the potential of nature's healing light. Here are a few of ways light can improve your life and the lives of your clients:

- wrinkles and stimulating collagen production
- skin disorders like psoriasis, eczema, acne, and vitiligo
- wounds and scars
- reducing inflammation

As the 21st Century approached research sponsored by NASA*, at the Medical College of Wisconsin, focused on the benefits of using LEDs for health. The research indicated faster healing of severe burns, difficult-to-heal wounds, muscle and tendon sprain, even damaged nerves and eye injuries. The press release announced: "Using powerful light-emitting diodes (LEDs), originally designed for commercial plant growth research in space, scientists have found a way to help patients here on earth." Along with the science that has proven Vitamins A, C, E, & B have potent anti-inflammatory and anti-oxidant properties, we have a fantastic duo for healing clients' skin. Here are some of the 25 serums available through dermaividuals® able to work in tandem with LED machines:

- D-panthenol
- Vitamin A
- Vitamin C
- Vitamin E
- CM-glucan
- Hyaluronic acid
- Coenzyme Q10
- Butcher's broom

We all know that there are no quick fixes or miracle cures: healing takes time. Even so, noticeable results can be obtained and the long-term effectiveness of using this fantastic duo in tandem is undoubted.
