**Clinically
Proven Results**

868 Professional Grade LEDs

LightStim MultiWave® Patented Technology simultaneously emits multiple wavelengths (colors) of light. These wavelengths of light work together to give your skin a more radiant and youthful appearance.

Used and recommended by estheticians, dermatologists and plastic surgeons for over 20 years. Designed and manufactured in the USA.

Real Results

100% of participants were shown to have significant improvement in their fine lines and wrinkles and improvement in their acne in the first 2-4 weeks.

Three months after our clinical trial, 92% of participants had an even further reduction in their wrinkles.

Reduce wrinkles on the entire face. Treat mild to moderate acne and reduce inflammation caused by acne.
