

# LightStim LED Bed

## What is LightStim?

LightStim delivers light energy in a similar way plants absorb light energy from the sun. Each LightStim device uses different wavelengths, or colors of light. LightStim LED Bed provides rejuvenating wavelengths of light energy to treat the body. Relax, listen to music or meditate while enjoying this warm, soothing and restorative treatment.

# LightStim LED Bed

## A Word From the Pros

CELEBRITY PLASTIC SURGEON

**Paul Nassif**

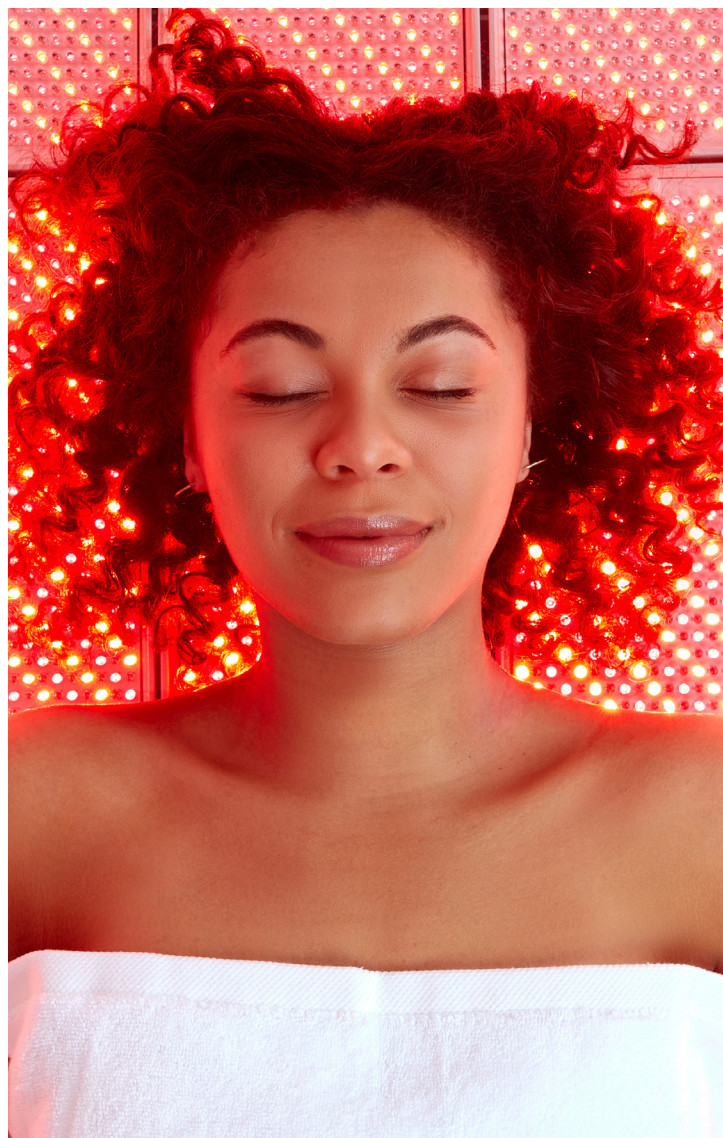

" Every postoperative patient gets treated with LightStim in my office to help decrease bruising, increase healing, and help with redness. I had a patient write me last week, thanking me profusely for the LightStim treatments and what it did for her. Every time she walked out of my office, she felt absolutely incredible and full of energy. "

PHOENIX SUNS, NBA

**Chris Paul**

" In my 17th NBA season, I am all about recovery and supporting my health and wellness off the court. The LightStim LED Bed helps me day in and day out and allows me to recover faster in between games and workouts. I use the LED Bed multiple times a week and every time I finish a treatment on the Bed I feel renewed. "

## Recommended by Professionals

LightStim LED light therapy devices have been used and recommended by estheticians, dermatologists, plastic surgeons, medical doctors and wellness professionals for over 20 years. Upgrade your treatment and enhance your results today.
