

All About LED

LED stands for light emitting diode, which is a tiny computer chip encased in glass. Each LED emits a wavelength of light that provides unique therapeutic benefits. LED is non-invasive, painless and requires no recovery time. Recovery Loop utilizes light stimulation in the light red, dark red, infrared and deep infrared spectrums. Each Recovery Loop pod is equipped with 80 medical-grade LEDs.

4 Wavelengths are Better than 1

Unlike other LED devices with one or two wavelengths, Recovery Loop is equipped with four wavelengths of light to bring soothing relief deep into the muscles and treat pain at it's source.

What is LightStim?

For over 25 years, LightStim has led the way in LED light therapy trusted by tens of thousands of professionals and over a million consumers for our commitment to quality, safety, and results.

Built to last a lifetime, our devices are manufactured in the USA at LightStim's FDA Certified medical-grade facility.

Recovery Loop Kits

1-Pod Kit

Economical and perfect for targeted, localized pain relief. Includes two straps, carrying case, and USB-C charging cable.

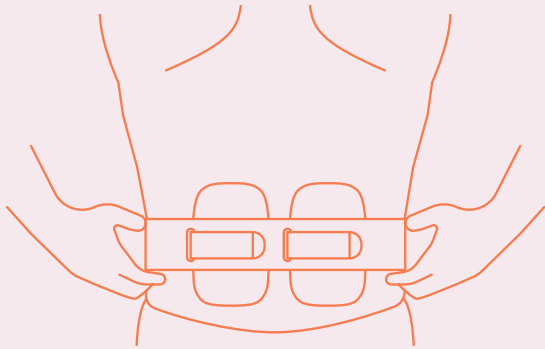

2-Pod Kit

Cover a larger area per treatment for faster relief. Includes two straps, carrying case, USB-C charging cable, and charging dock.

Relieve Pain Naturally

Soothe tired muscles, aches and pains caused by life's activities. Relieve arthritic, muscle and joint pain by jumpstarting the body's natural recovery process.

Designed for hands-free treatment, Recovery Loop can be clipped to two sizes of adjustable straps for placement on arms, knees, the lower back, and more.

How it Works

LightStim delivers light energy to your body, similar to the way plants absorb sunlight. Each LightStim device harnesses multiple wavelengths, or colors, of light. Recovery Loop reduces pain and increases local blood circulation using these wavelengths of light.
