

Saian Microneedling Protocol

Suggested Treatment time – varies.

Suggested Price – varies.

This protocol is designed to guide you through product application pre-and post needling with a pen or a roller. Saian Pure Hyaluronic Acid Serum is the perfect High Molecular Weight Hyaluronic Acid (HMWHA) for needling, at 1.8 million daltons. We recommend purchasing “The Concise Guide to Dermal Needling Third Medical Edition - Revised & Expanded” by Dr. Lance Setterfield MD for more in-depth treatment, ingredient and device selection, as well as precautions and contraindications. Do not needle unless you have been certified and have the appropriate licensing for your state.

*Before beginning the treatment, make sure you have your **Saian Cool Duo Massagers** in the freezer.*

1. Cleanse the neck and face with **Saian Replenishing Cleanser** or **Strawberry Cleanser**, depending on skin type.
2. Blend a teaspoon of **Saian Enzyme Mask** powder with equal part warm water to make a smooth paste, and apply to the face, neck and décolleté for 7-10 minutes with steam.
3. Remove the **Saian Enzyme Mask** thoroughly.
4. Spray the face with **Saian Herbal Toner** to help bring the pH back to normal.
5. If working with numbing crème, apply the numbing crème to the treatment area and leave for 30 minutes.
9. Remove the numbing crème before needling.
10. Perform the treatment in parts: forehead, left and right cheeks, nose, upper lip and chin. Work on the forehead last, you may even leave the numbing crème longer on the forehead to absorb better.
11. Apply a thin layer of sterile saline to the client's skin and select the appropriate pen or roller needle length based your client's needs. Perform needling according to your device's manufacturer's instructions. Work on all 5 sections in the same manner until the entire face has been treated.
12. Immediately after needling, apply a nickel size amount of **Saian Pure Hyaluronic Acid Serum** to the entire area.
13. After applying the serum, cover the client's eyes with protective goggles (optional for comfort) and position your **LightStim** device about an inch away from the client's face. Leave the mask under the light for 20 minutes for best results. The panel has a timer, and will shut off automatically.
14. Roll over the face with previously frozen **Saian Cool Duo Massagers** for 2-3 minutes to close the pores.

Suggested Home Care Products (after 24 hours only)

>> **Saian Vital K Creme**

- Perfect for post-surgical and injection-site bruising, but also ideal for micro-needling, cuperose, rosacea, and dark under-eye circles.
